

Frequently Asked Questions for Next Generation Security Leader (NGSL)

What is a Next Generation Leader Event?

Next Generation Security Leader (NGSL) Events are peer-reviewed, research-based sessions that recognize evolving global risks that require collaborative and cross-functional security risk mitigation management. It's geared for current and emerging risk mitigation practice leaders and their teams.

NGSL leverages the SEC's Security Leadership Research Institute (SLRI) findings, studies and surveys. Also input from the Darla Moore International School of Business, Risk and Uncertainty Management Center; Kennesaw State, Coles College of Business; and successful practitioners. The SEC's Collective Knowledge™ approach informs and prepares leaders to be organizationally relevant and valuable for meeting rising global risk, regulatory and value performance expectations in their organizations.

Why Attend?

- Gain insight to successful approaches for brand protection and resilience.
- Engage with security leaders who have demonstrated capability and value to executive and client stakeholders.
- Expand confidence for aligning brand threats with ROI-capable opportunities and all-hazard risk mitigation solutions.
- Differentiate products, processes and services for better outcomes.
- Learn and share innovation and optimization for value contribution.
- Spend a day with colleagues, peers, staff and thought leaders to understand current, imminent and long-term future strategic needs to meet and exceed leadership expectations.

What Takeaways do Participants Find Valuable?

- Align organization risk priorities with management.
- Build leadership and organizational feedback and confidence for your risk mitigation story.
- Demonstrate return-on-investment.
- Develop, engage and retain diverse talent.
- Facilitate strategic leadership conversations.
- Influence innovation investment and program proliferation.
- Intelligently prioritize governance and regulatory compliance.
- Insight with Security State of the Industry concepts and case studies for improved risk outcomes.
